Summary

Java Full Stack Developer with hands-on experience in backend optimization using Quarkus and scalable MERN applications. Solved 500+ DSA problems with strong focus on performance-driven systems. Passionate about building high-performance, scalable backend systems and continuously improving system efficiency through modern frameworks and optimization techniques.

Education

Galgotias University , Greater Noida , Uttar Pradesh Computer Science B.Tech , CGPA: 8.8	Sept. 2022 – July 2026
Blooming Bud's Academy (CBSE) , Khalilabad , Uttar Pradesh Senior Secondary (Class XII) , Percentage: 85.6%	Apr. 2019 – Mar. 2020
Blooming Bud's Academy (CBSE) , Khalilabad , Uttar Pradesh High School (Class X) , Percentage: 78.6%	Apr. 2017 – Mar. 2018

Skills

Languages: C, C++, JavaScript, TypeScript
Frontend: HTML, CSS, React.js, Bootstrap
Backend: Spring, Spring Boot, Rest API, Microservices
Database: MongoDB, SQL
Tools Platforms: Git, GitHub, VS Code, Postman, MongoDB Atlas
Core Subjects: DBMS, OS, CN, Software Engineering, OOPs
Target Roles: Java full Stack Developer | Software Developer

Projects / Open-Source

E-Commerce website Technologies: React.js, Node.js, Express.js, MongoDB - Designed and implemented a scalable MERN-based e-commerce platform supporting user authentication. - Implemented JWT authentication, product management, and a fully responsive UI across all devices. - Integrated MongoDB Atlas for secure and scalable cloud data storage and retrieval.	GitHub
Weather App Technologies: React.js, Tailwind CSS, OpenWeatherMap API - Built a responsive weather forecasting web app displaying real-time weather data and 7-day forecasts using the OpenWeatherMap API. - Implemented dynamic React components seamless UI updates and mobile-friendly design.	GitHub

Experience

Infosys (On-site) Jan 2026 – Apr 2026	Certificate
Power Intern (Java Full Stack Developer) - Developed and enhanced a Tennis Match Management Platform, focusing on scalable backend architecture and efficient request handling. - Led migration of backend services from Spring Boot to Quarkus, achieving faster application startup and improved runtime memory utilization. - Redesigned data access layer by transitioning from Spring JDBC Template to Panache ORM, simplifying database operations and reducing boilerplate code. - Integrated Agroal connection pool for efficient database connectivity, ensuring better resource management under concurrent user load. - Improved overall system responsiveness by optimizing memory usage patterns and reducing API response latency.	

Achievements

- Solved 500+ DSA problems on **LeetCode** and **GeeksforGeeks**, building strong problem-solving skills.
- Rated Gold Level on HackerRank for problem-solving.
